

护栏管是由红、黄、绿、蓝、白等不同颜色的PC管、LED二极管、电脑程序数码控制器等系列产品组成，从而产生一种崭新的光源（彩色光源），并演化出渐变、闪变、扫描追逐效果，既具有日光灯式的柔和，又具有霓虹灯式的明艳及动感，是光电技术的最新应用和发展。该产品广泛应用于：立交桥、河道护栏、花园、建筑外墙等不同场所的装饰照明。

The Hurdle Lamp is composed of PC different color, LED diode, digital controller etc., which produces a brand new light source (color source) and shows the chasing and glimmering effect. As it either possesses the softness of daylight lamp or having the activeness of the neon lamp, it becomes the new application and development of electricity technology. The light is great for lighting in crossroads, river protective railing, garden, building exterior etc.
